EDUCATION

Kalinga Institute of Industrial Technology

Bhubaneswar, India

Bachelor of Technology(B.Tech) in Computer Science and Engineering , CGPA: 8.72 Sep 2021 - Sep 2025

PROJECTS

KryptoLinks [🔗 Github](#)

React, NodeJS, TailwindCSS, Ethers.js

Created a clone of bio.link using React, Tailwind, Node and MongoDB. Users can create profile links with their details and share them. They can add their Ethereum addresses to allow payments through the link. Implemented authentication of users by verifying their signatures on the backend.

Keep Clone [🔗 Github](#)

React, Redux, TipTap, Typescript

Created a clone of Google Keep. Users can create notes, edit notes, delete notes, add labels to notes, and search for notes. Authentication has also been implemented. The app uses a mock backend to store and retrieve data.

QuizzUp [🔗 Github](#)

React, Redux, Typescript, NodeJS, MongoDB

QuizzUp is a web application that allows you to play quizzes and based on your favourite programming languages. Made using React and Node.js. It has all the functionalities like authentication, taking quizzes, leaderboard, etc.

flow.vid [🔗 Github](#)

React, React Player, MockBee

A video library made with React.js and Mock Backend along with all the functionalities like Watch Later, History, Playlist Management, Likes and Filtering.

GameSandbox [🔗 Github](#)

React, MockBee

Created a simple e-commerce site using React with all the functionalities like cart and wishlist management.

SKILLS

Programming Languages: C/C++, Javascript, Golang, Python, Typescript

Development: React, Next.js, GraphQL, NodeJS

Databases: MongoDB, MySQL

Others: Git, Linux, Bash, Docker, Firebase, L^AT_EX

ACHIEVEMENT

- **Finalist** at hackneoG hackathon organized by **neogCamp** (*Top 9 out of 34 Teams*)
